I've tried out several counters. The M1 with backlight is the best, the  
backlight flashes on when it locks onto a frequency. It's also the most  
sensitive counter.

Mike

To: ham-equip@ucsd.edu

I paid \$350 (shipped) VIA the rec.radio.swap news group for a TR-4Cw  
that is in excellent like new condition about two months ago. You may  
find a TR-4 for a little less because it is a little older vintage.  
There is a Drake and tube radio net on 80 Meters (3.865 MC.) on  
Saturday night at 8:00 P.M. It originates out of Ohio... Drake  
country...

Good Luck....
